ABOUT ME

I'm a front-end developer with experience building modern web applications using Vue.js, React Native, and TypeScript. My expertise includes responsive design with HTML, CSS, Bootstrap, and Tailwind CSS.

I've collaborated with diverse clients on web and mobile projects, delivering user-focused interfaces and reusable components. Currently focused on advancing Vue.js expertise and industry best practices.

PROFESSIONAL EXPERIENCE

Front-end Developer, Sync Zone (remote, full time)

February 2024 - March 2026

- Developed mobile applications using React Native and web platforms with React.js
- Built responsive user interfaces and integrated RESTful APIs for seamless data flow
- Created reusable components to maintain code consistency across projects
- Collaborated with design and backend teams to implement new features and resolve technical challenges

Online English teacher, LingoTurtle, Belgrade (remote)

June 2020 - Present

- Conducted 12,000+ online English lessons for international students
- Developed strong communication and problem-solving skills in virtual environment

English Teacher, Training Centers / Kindergartens, China

April 2018 - January 2020

- Taught English to children aged 3-17 in immersive classroom environments
- Created interactive lessons using games, songs, and practical applications to engage young learners
- Adapted teaching methods to diverse learning styles and proficiency levels

EDUCATION

IT Bootcamp

April 2023 - July

- PHP Developer, Web Development

Business Academy LC

April 2019

- Certificate in English Linguistics (Score: 87/100)

Rolling Stock Technician, Railway Technical High School

September 2009- June 2013

- High School Diploma, Railway Technology

SKILLS

Frontend: Vue.js, React.js, JavaScript, TypeScript, HTML5, CSS3, Webflow

Styling: Bootstrap, Tailwind CSS, Responsive Design

Backend: PHP, MySQL, RESTful APIs

Tools: Git, GitHub, Component Architecture

Languages: English (C2), Serbian (Native)

PROJECTS

Gradoria

React Mobile Application

- Built a cross-platform mobile application for iOS and Android using React and CapacitorJS
- Developed responsive user interfaces and integrated API communication via Axios and React TanStack Query
- Configured development environment with CapacitorJS for native code conversion and deployment
- Collaborated using Git version control with branch management and code review processes

Sync Zone Company Website

React.js Business Website

- Developed company website from scratch using React.js, Vite, and TypeScript for optimal performance
- Built a responsive business website with a modern UI/UX design for a professional service showcase
- Implemented a fast development workflow with the Vite build tool and hot module replacement
- Configured TypeScript for enhanced code quality and ESLint for consistent coding standards

MySpine Physiotherapy Website

Freelance React.js Website

- Built a professional portfolio website for a physiotherapy practice using React.js and Vite
- Created a responsive showcase for physiotherapy services and practitioner credentials
- Designed a clean, modern interface to establish a professional online presence
- Delivered a complete website solution from concept to deployment

Crypto Dashboard Web Application Website

Website

- Built a responsive cryptocurrency tracking dashboard using React.js and modern web technologies
- Developed real-time price monitoring features displaying market data and price fluctuations
- Implemented interactive charts and data visualization components for crypto analytics
- Collaborated closely with design principles through multiple iterations to achieve an intuitive user experience
